EDUCATION

Bachelor of Science, Computer Science, Sept 2021 – Apr 2025

University of Saskatchewan, Saskatoon, SK

GPA: 3.2 / 4.0 • Relevant coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Software Engineering, Object-Oriented Systems Design

CERTIFICATIONS

- Microsoft 365 Certified: Microsoft
- ITIL Foundation: Udemy · Jan 2026 – Jan 2028
- Digital Marketing: Google · Aug 2024 – Dec 2034
- Apple Certified IT Technician (ACiT): Apple—currently working on
- COMP TIA+—currency working on

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, C++, SQL, HTML/CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Flask, TensorFlow

Databases: MongoDB (Compass and Atlas), MySQL, PostgreSQL

Systems & Networking: Linux CLI, TCP/IP, Network Troubleshooting, REST APIs

Developer Tools: Git, GitLab, Docker, JWT, CI/CD, Vercel, Render

IT Service Management: Jira, Incident Management, Technical Documentation, ITIL, Agile/Scrum, SDLC, Microsoft 365

WORK EXPERIENCE

Theatre Manager—Cineplex Entertainment, Regina, Sk

Aug 2025–Present

- Supervised and coached 25+ employees across guest services, concessions, retail, and entertainment operations.
- Trained 40+ new hires on customer service, POS systems, safety protocols, and operational procedures.
- Implemented workflow improvements that reduced wait times by 18% and increased service speed.
- Operated POS and scheduling systems; contributed to 8–12% sales growth through optimized staffing and product placement.
- Managed staff scheduling across multiple shifts, improving labor efficiency by 10%.
- Conducted weekly performance check-ins, reducing employee error rates by 15%.
- Compiled weekly operational summaries analyzing sales trends, staffing efficiency, and customer feedback.

Assistant Manager—Cineplex Entertainment, Saskatoon, Sk

Nov 2024–Aug 2025

- Resolved 200+ customer escalations with a 95% satisfaction rate, leading to promotion within nine months.
- Coordinated onboarding and training for 30+ new hires, ensuring compliance with operational standards.
- Maintained accurate cash handling across multiple POS terminals with a <1% error rate.
- Streamlined opening and closing procedures, reducing shift handover inconsistencies by 20%.
- Provided technical support for POS and scheduling systems, resolving 150+ internal support issues.
- Monitored operational data to identify bottlenecks and implemented improvements that increased throughput by 12%.

Software Development Mentor—University of Saskatchewan, Saskatoon, SK,

May 2024–Dec 2024

- Mentored 25+ students on debugging, algorithms, and object-oriented design.
- Reviewed 100+ codebases, improving adherence to best practices and reducing defects.
- Advised teams on technology selection and Git workflows, helping resolve 70+ project blockers.
- Managed 7 Git repositories, enforcing consistent version control practices and branching standards.
- Facilitated one-on-one and group sessions to strengthen programming and problem-solving skills.
- Supported preparation of project documentation and technical portfolios.

Technical Support Specialist (Remote) — Prince Technology Inc.

Jul 2023 – Aug 2024

- Diagnosed and resolved 75+ hardware, software, and TCP/IP issues via phone, email, and remote support.
- Achieved a 92% first-contact resolution rate and reduced repeat tickets by 25%.
- Documented troubleshooting steps in Jira, contributing 80+ knowledge-base articles.
- Escalated complex issues using structured triage criteria, meeting SLA targets 98% of the time.
- Used remote desktop tools to resolve configuration issues, reducing on-site visits by 40%.
- Delivered high-volume customer support while maintaining professionalism and empathy.

PROJECTS

IT Service Desk & Incident Management System — Full-Stack ITSM Platform

React.js, TypeScript, Node.js, Express.js, MongoDB/PostgreSQL, JWT, Docker

- Built a lightweight IT service desk and incident management platform modeled on ServiceNow/Jira Service Management, covering the full ticket lifecycle.
- Implemented JWT-based authentication with role-based access control (RBAC) for end users, technicians, and admins.
- Designed a status workflow (Open → In Progress → Resolved → Closed) with Low/Medium/High/Critical priority levels and ticket assignment to technicians.
- Built a technician dashboard with search, filter, and sort, plus an admin dashboard with charts for ticket volume and SLA performance.
- Added internal notes, file attachments, email notifications, SLA tracking, and a full ticket history/audit log.
- Developed a knowledge-base module and REST API to support self-service and third-party integrations.

NutriTracker — Full-Stack Health and Nutrition Web Application

React.js, Node.js, Express.js, MongoDB, Flask, TensorFlow, JWT, Twilio, GitLab, Docker

- Built a full-stack health and nutrition tracker with a React.js frontend and Node.js/Express.js backend, storing data in MongoDB.
- Implemented JWT authentication and REST APIs to secure user access and connect components.
- Integrated Flask + TensorFlow chatbot for AI-assisted nutrition and fitness recommendations.
- Collaborated in a 4-member team using GitLab and Docker to standardize the development environment.
- Optimized API performance and reduced latency by 30% through efficient request handling.
- Designed a normalized MongoDB schema for user profiles, meal logs, and progress tracking to support efficient, scalable queries.

Pet Management System

Java, Object-Oriented Programming, File I/O

- Developed a Java application for managing pet records, scheduling, and service information.
- Applied OOP principles, including encapsulation, inheritance, and polymorphism.
- Implemented file-based data persistence to ensure reliable record storage.
- Enhanced user interface for easier navigation and record management.
